### NORTHSTAR WORKS ON EMERGENCY GENERATOR SYSTEMS

Recently a condominium location had a sprinkler pipe burst in their electrical room. It caused major damage to the switch gear box and breakers. Since the situation left the residents of the condominiums without power, it became an emergency where the power company, township fire marshal and inspectors, and our office became involved to quickly restore power during the freezing temperatures.

We needed to meet with the electrical inspector to confirm damages and find out which materials would be needed for replacement, plus obtain information on the requirements for the correct type of generator needed to get temporary power to the residents. The generator hook-up required meeting

with the power company to shut off the current power and supply new power with the generator.

Once power through the generator was supplied we were able to repair the damaged switch gear box and breakers.

Permits were required by the township, but due to the nature of this emergency we were able to

repair this under the supervision of the electrical inspector while permits were in process.

The power company has since restored power to the community, and all repairs have been made to the electrical room.

If you or your customers are experiencing power outages or require generator hook-ups, Northstar can be of assistance. Contact us today! 610-539-2200 or 888-73-NORTH.
